### EXPERIENCE

#### [siamandshirzad.ir](#)

A personal website built to showcase my profile and enable direct communication, featuring contact links and a custom-styled Formik form for messaging. Deployed on Vercel for fast hosting and deployment, the project leverages React Router for routing, Tailwind for responsive design, Framer Motion for animations, Axios for API communication, Toastify for notifications, and customized UI components

#### [admin-panel](#)

An admin panel connected to a real backend, handling data communication via Axios. Features include product, user, and order management, built with React and Bootstrap for a responsive design. The project includes authentication functionality.
