Electrical Engineering

Isfahan University of Technology

SOFT SKILLS

- Teamwork & Collaboration
- Problem Solving & Practical Solutions
- Effective & Clear Communication
- Adaptability & Continuous Learning

ABOUT ME

A versatile Web Developer with a strong foundation in modern frameworks and scalable architectures. Transitioned from a dedicated React background to comprehensive web development using Vue.js, Nuxt.js, and Python. Currently focused on ensuring software reliability and excellence as a QA Engineer for enterprise banking systems. Enthusiastic about continuous learning, delivering robust automated solutions, and collaborating with professional teams.

EXPERIENCE

Quality Assurance Engineer & Web Developer

Saba Pardazesh — Internet Bank Tejarat Project

- Ensuring the quality, reliability, and security of the Internet Bank Tejarat platform through rigorous software testing protocols.
- Designing and implementing automated end-to-end (E2E) testing architectures using Playwright and Cypress for complex banking features, including batch third-party fund transfers.
- Collaborating with cross-functional teams to optimize front-end architecture, leveraging Vue.js and Nuxt.js for high-performance applications.
- Establishing QA standards and developing research and development roadmaps for internal banking projects.

Front-End Web Developer

Freelance & Personal Projects

Personal Portfolio — siamandshirzad.ir

A personal website built to showcase my profile and enable direct communication. Deployed on Vercel for fast hosting and deployment. The project leverages React Router for routing, Tailwind for responsive design, Framer Motion for animations, and a custom-styled Formik form for messaging.

ReactTailwindFramer MotionFormikVercel

E-Commerce Admin Panel

An admin panel connected to a real backend, handling data communication via Axios. Features include product, user, and order management, built with React and Bootstrap for a responsive design. Integrated state management via Redux Toolkit and complex data visualization using Chart.js.
